INTRODUCTION

About this report

This report shows how the internet at Your library was used from 28 October to 10 November 2026: what people used it for, which services they relied on and when, and how the web filter kept them safe. Figures come from the filter that handles every website lookup on your network. No personal information is collected: the filter does not know who used a computer or phone.

Contents

Summary: 28 October to 10 November 2026 at a glance page 3

Section 1 Trends over the period page 4

Section 2 What the internet was used for page 5

Section 3 Most used services and websites page 6

Section 4 When people were online page 7

Section 5 Branches and networks page 8

Section 6 AI tools page 9

Section 7 Safety and protection page 10

Section 8 Most blocked websites page 11

Section 9 CIPA compliance record page 13

Section 10 Behind the scenes page 14

Section 11 Recommendations page 15

How to read the figures

Website visit	Lookups for the same website on the same network count as one visit until 30 minutes pass without one.
Lookup	A device asking where a website is. Opening one web page usually makes many lookups (its images, scripts, fonts and ads come from many addresses), so lookups are much higher than the number of visits or of people.
People-facing use	Lookups for websites and services people use. Device updates, advertising networks and IT systems are counted separately (Behind the scenes).
Blocked	A lookup the filter stopped because of your policy. The website does not open for the person who tried.
Compared with	Every change is against the previous 14 days (14 to 27 October 2026).

28 OCTOBER TO 10 NOVEMBER 2026 AT A GLANCE

About 643 website visits a day, mostly Google Search and services, YouTube, Wikipedia and Indeed

Compared with the previous 14 days. People-facing figures leave out device updates, advertising and IT systems.

9,004
Website visits
−3%

643
Visits per active day
14 active days

120

self-checks of the main server

Lookups are not visits: one web page makes many lookups (images, scripts, ads). See How to read the figures.

Headline findings

01 **9,004 website visits by people on the network**
Down 3% compared with the previous 14 days. They come from 19,596 lookups by people. Down 5% compared with the previous 14 days. Busiest day: Tuesday 3 November with 1,914 lookups.

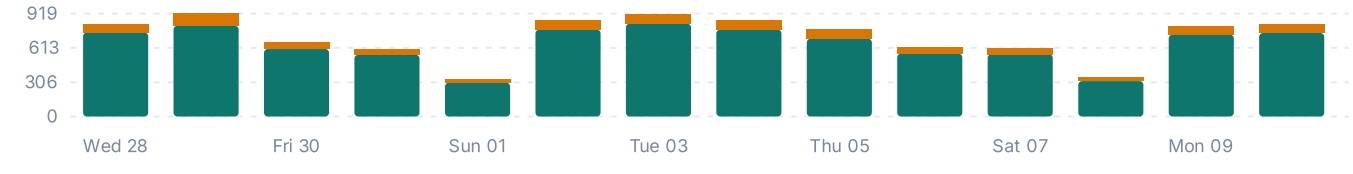
02 **Search, office and online tools was the biggest use, 24% of lookups**
Followed by video, music, sports and entertainment (14%), social media and communities (9%), learning and education (9%).

03 **Library services and e-resources: 863 lookups**
Most used: Libby / OverDrive, WorldCat, EBSCO.

04 **1,170 lookups blocked by your policy**
Including 303 adult content, 234 VPN or proxy websites. Not counted: 68 automatic encrypted DNS lookups by browsers, kept on the filter.

05 **48 AI tools reached**
Most used: ChatGPT (OpenAI), with 72 lookups.

Website visits per day

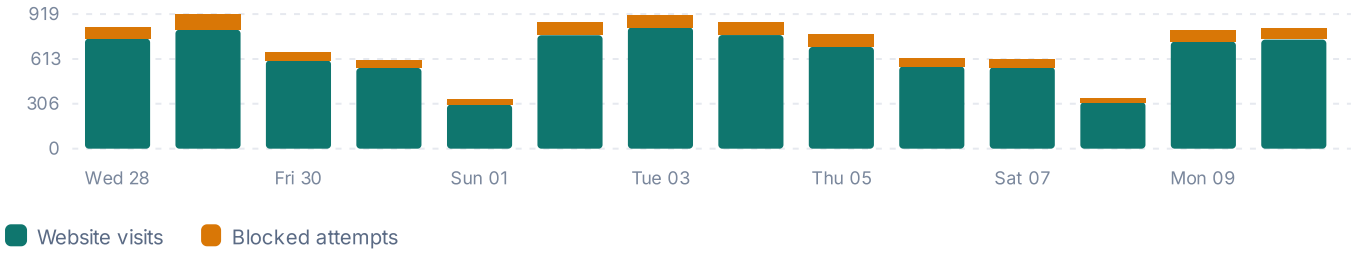


SECTION 1

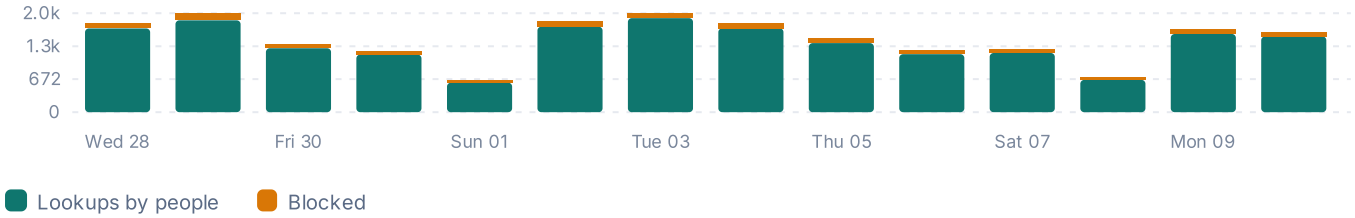
Trends over the period

How use changed from day to day: website visits, lookups, the number of different websites and the purposes people used the internet for.

Website visits per day



Lookups by people per day



Different websites and services visited per day

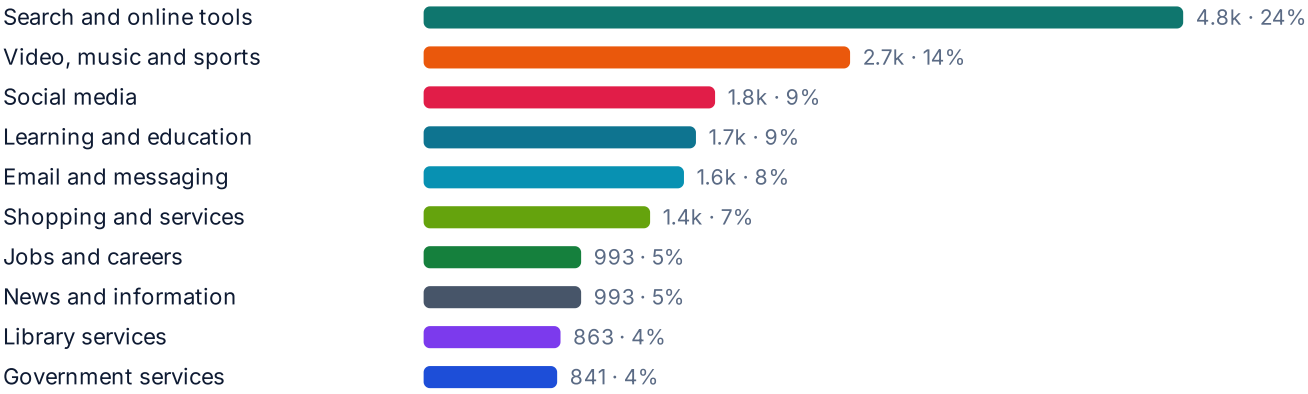
Top 10 purposes by website visits, day by day

Each small chart has its own scale; the number in the corner is the total for the period. Website visits group lookups into visits (see How to read the figures).

SECTION 2

What the internet was used for

Every website and service is grouped by purpose, so the board can see the public value of the connection: learning, jobs, government services, health and more.



By purpose, with the change

PURPOSE	VISITS	LOOKUPS	SHARE	PREVIOUS 14 DAYS	CHANGE	MOST USED
Search, office and online tools	1,166	4,788	24.4%	4,969	−4%	Google Search and services, Google Docs and Drive
Video, music, sports and entertainment	688	2,688	13.7%	2,880	−7%	YouTube, Spotify
Social media and communities	1,158	1,837	9.4%	2,018	−9%	Facebook, Instagram
Learning and education	1,009	1,717	8.8%	1,783	−4%	Wikipedia, Khan Academy
Email, calls and messaging	862	1,641	8.4%	1,868	−12%	Gmail, Outlook
Shopping, travel and everyday services	910	1,428	7.3%	1,467	−3%	Amazon, Walmart
Jobs and careers	257	993	5.1%	1,003	−1%	Indeed, USAJOBS
News and information	732	993	5.1%	951	+4%	The Weather Channel, MSN
Library e-books, databases and services	514	863	4.4%	916	−6%	Libby / OverDrive, WorldCat
Government and public services	428	841	4.3%	900	−7%	IRS, Social Security
AI tools	647	755	3.9%	756	no change	claude.ai, Microsoft Copilot
Banking and finance	254	535	2.7%	565	−5%	PayPal, Chase

Library services and e-resources: 863 lookups. Includes your own website and catalog, e-books, databases, PC booking and printing.

SECTION 3

Most used services and websites

Known services are shown by name (for example YouTube or Google Classroom); other websites by their address. Adult website names are masked.

#	SERVICE OR WEBSITE	PURPOSE	VISITS	LOOKUPS	SHARE	CHANGE	DAYS
1	**Google Search and services**	Search, office and online tools	209	3,096	15.8%	−1%	14
2	**YouTube**	Video, music, sports and entertainment	185	2,077	10.6%	−7%	14
3	**Wikipedia**	Learning and education	277	769	3.9%	+5%	14
4	**Indeed**	Jobs and careers	66	632	3.2%	+1%	14
5	**Google Docs and Drive**	Search, office and online tools	265	620	3.2%	−2%	14
6	**Gmail**	Email, calls and messaging	263	597	3.0%	−12%	14
7	**Facebook**	Social media and communities	259	582	3.0%	−8%	14
8	**Outlook**	Email, calls and messaging	229	498	2.5%	−10%	14
9	**Amazon**	Shopping, travel and everyday services	247	483	2.5%	−2%	14
10	**Libby / OverDrive**	Library e-books, databases and services	227	407	2.1%	−4%	14
11	**Microsoft 365**	Search, office and online tools	225	357	1.8%	−18%	14
12	**Instagram**	Social media and communities	199	311	1.6%	+1%	14
13	**TikTok**	Social media and communities	189	266	1.4%	−19%	14
14	**Canva**	Search, office and online tools	178	260	1.3%	−12%	14
15	**The Weather Channel**	News and information	175	253	1.3%	no change	14
16	**IRS**	Government and public services	94	248	1.3%	−5%	14
17	**Khan Academy**	Learning and education	181	247	1.3%	−8%	14
18	**Bing**	Search, office and online tools	167	243	1.2%	+3%	14
19	**USAJOBS**	Jobs and careers	91	243	1.2%	+2%	14
20	**PayPal**	Banking and finance	89	241	1.2%	−7%	14

New this period

No new services with meaningful use.

No longer used

Nothing dropped away.

SECTION 4

When people were online

Use these patterns for staffing, opening hours and maintenance windows. Weekday figures are averages per day, so a weekday that occurs twice in the period does not count double. Darker squares mean more activity.

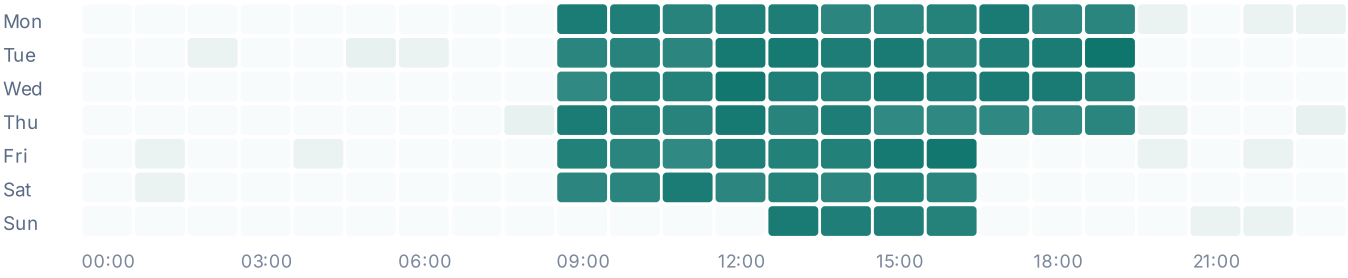
Tue 3 Nov
Busiest day
1,914 lookups

Tuesday 19:00
Busiest hour of the week
on average, peak in the heat map

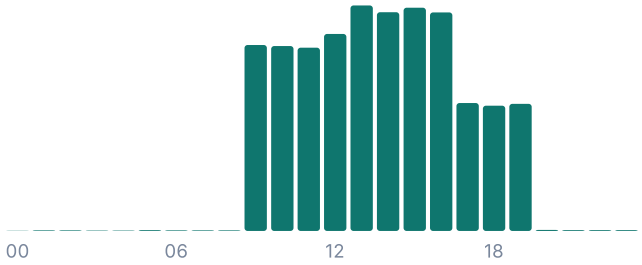
13:00 to 14:00
Busiest hour of the day
across all days

Tuesday
Busiest weekday
on average per day

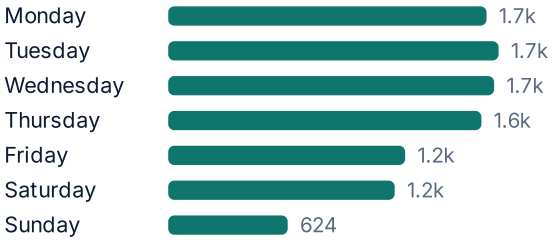
Day of the week and hour (average per day)



Hour of the day



Day of the week (average lookups per day)



Activity at night: computers, phones and tablets that stay switched on keep checking email and apps and download updates on their own, without anyone using them. Device updates, ads and IT systems are counted separately under Behind the scenes.

Times in America/New_York.

SECTION 5

Branches and networks

Each branch or network separately. Unblocks are staff and patron unblocks on that network.

Figures per network

NETWORK	LOOKUPS BY PEOPLE	SHARE	BLOCKED	UNBLOCKS
Public computers	10,445	53.3%	687	3
Staff Wi-Fi	5,200	26.5%	29	1
Children's area	3,951	20.2%	522	0

SECTION 6

AI tools on your network

48 AI tools were reached in this period, matched against a register of more than 11,000 AI tools that is updated every day. A company's own website is counted with its AI tool (openai.com with ChatGPT). New means not seen in the previous 14 days.

AI TOOL	WEBSITE	LOOKUPS	BLOCKED	STATUS
ChatGPT (OpenAI)	chatgpt.com	72	238	Partly blocked
Claude (Anthropic)	claude.ai	134	0	Allowed
Microsoft Copilot	copilot.microsoft.com	110	0	Allowed
Grammarly	grammarly.com	74	0	Allowed
Perplexity	perplexity.ai	65	5	Partly blocked
DeepL	deepl.com	57	0	Allowed
Character.AI	character.ai	0	34	Blocked
QuillBot	quillbot.com	33	0	Allowed
Khanmigo	khanmigo.ai	31	0	Allowed
Otter.ai	otter.ai	25	0	Allowed
Grok	grok.com	22	0	Allowed
Gamma	gamma.app	18	0	Allowed
Midjourney	midjourney.com	12	6	Partly blocked
Meta AI	meta.ai	13	2	Partly blocked
Suno	suno.com	9	4	Partly blocked
Remove.bg	remove.bg	9	3	Partly blocked
Gauth	gauthmath.com	0	10	Blocked
Talkie	talkie-ai.com	0	10	Blocked
MagicSchool	magicschool.ai	10	0	Allowed
DeepSeek	deepseek.com	0	9	Blocked
Gemini Notebook (formerly NotebookLM)	notebooklm.google	9	0	Allowed
Undetectable AI	undetectable.ai	0	7	Blocked
ZeroGPT	zerogpt.com	6	0	Allowed
DeepAI	deepai.org	0	6	Blocked
Photomath	photomath.com	0	6	Blocked
Cursor	cursor.com	5	0	Allowed

SECTION 7

Safety and protection

What the filter stopped under your policy. The website did not open for the person who tried; nothing else is recorded about them.

303
Adult content blocked

234
VPN and proxy websites blocked

4
Staff unblocks, each logged

68
Encrypted DNS kept on the filter (automatic)

Blocked by category

CATEGORY	BLOCKED	PREVIOUS 14 DAYS	CHANGE
AI / LLM Tools AI chatbots and tools	366	425	−14%
Adult Pornography and explicit content	303	290	+4%
VPN / Proxy / Anonymizers Tools that go around the filter	234	249	−6%
Gambling Betting and online casinos	119	123	−3%
Gaming Online games	75	86	−13%
Browser encrypted DNS (automatic) Browsers trying their own encrypted DNS; kept on the filter, every device stayed filtered	68	80	−15%
Custom block list	41	39	+5%
Dating Dating sites	32	25	+28%

Not listed: 68 automatic encrypted DNS lookups by browsers (cloudflare-dns.com, dns.google, opendns.com). Browsers such as Firefox, Chrome and Edge try their own encrypted DNS service every few minutes; the filter blocks it, the browser falls back to the filter, and every device stays filtered. Nobody was trying to get around the filter.

SECTION 8

Most blocked websites

The websites the filter blocked most often, up to five for each category, so you can see it working across your policy. Adult website names are masked; every blocked website is in the Excel export.

AI / LLM Tools · 366 blocked

Not listed: 68 automatic encrypted DNS lookups by browsers (cloudflare-dns.com, dns.google, opendns.com). Browsers such as Firefox, Chrome and Edge try their own encrypted DNS service every few minutes; the filter blocks it, the browser falls back to the filter, and every device stays filtered. Nobody was trying to get around the filter.

SECTION 9

CIPA compliance record

The Children's Internet Protection Act asks libraries and schools that receive E-Rate discounts for a technology protection measure and records. This page summarises yours for the period.

- **Visual depictions that are obscene, child pornography or harmful to minors are blocked**
  Adult category blocked in profile Public computers, Children's area, Staff
- **Tools that go around the filter are blocked**
  VPN, proxy and anonymizer websites, plus encrypted DNS services
- **Adults can have the filter disabled for bona fide research or other lawful purpose**
  4 staff unblocks and 0 patron self-unblocks recorded, 3 ending by themselves and 1 switched back on early by staff or the patron
- **The filter was in place throughout the period**
  Availability 100.00%
- **Records are kept**
  Activity log, unblock log and this report

This record supports your own documentation. It is not legal advice and does not guarantee E-Rate eligibility.

SECTION 10

Behind the scenes

Computers, phones and IT systems also talk to the internet on their own: updates, advertising networks, security agents and cameras. This traffic is kept apart from the people-facing figures.

Lookups by people	19,596 · 75%
IT, security and building systems	0 · 0%
Device updates, ads and content networks	5,219 · 20%
Blocked	1,238 · 5%

Largest background sources

SERVICE	TYPE	LOOKUPS	SHARE OF ALL
googleapis.com	Device updates, ads and content networks	936	3.6%
gstatic.com	Device updates, ads and content networks	899	3.5%
microsoft.com	Device updates, ads and content networks	791	3.0%
apple.com	Device updates, ads and content networks	722	2.8%
msftconnecttest.com	Device updates, ads and content networks	673	2.6%
digicert.com	Device updates, ads and content networks	471	1.8%
windowsupdate.com	Device updates, ads and content networks	445	1.7%
windows.com	Device updates, ads and content networks	282	1.1%

SECTION 11

Recommendations

What to decide next. Everything else is already on the pages before.

1. **Check SafeSearch**
   SafeSearch is off in at least one profile. With it on, Google, Bing and other search engines hide explicit images in results for everyone on that network.

About the figures

Figures come from the lookups your filter handled for Your library, grouped by day in America/New_York. Websites are grouped by purpose from a database of 20 million categorized websites and a register of named services and AI tools. Short gaps are possible while a device uses a cached answer. Report generated 11 November 2026, 02:20.

Disclaimer: this report is provided for information only. Figures depend on the lookups the filter handled and may be incomplete. It is not legal advice and does not guarantee CIPA compliance, E-Rate eligibility or funding. To the fullest extent permitted by law, Alpha Quantum d.o.o. accepts no liability for any loss or damage arising from the use of this report.
